FOUNDED 1918 • INCORPORATED 1924

Fire and Sustainability – An IFE/BRE Workshop

Date: Thursday 14th October 2010

Venue: BRE, Bucknalls Lane, Garston, Watford WD25 9XX
Use WD25 9NH for Satnav
(<http://www.bre.co.uk>)

DELEGATE INFORMATION

Sustainability and the protection of the environment (in its widest sense) are topics which are driving the agendas of many organisations, in particular government departments and the construction sector, but fire safety and fire protection is not yet appearing on these.

The IFE Conference in July 2010, on Fire Engineering to Improve Sustainability of Communities, highlighted many of the changes in building and material technologies which have implications for the fire community; in design (fire engineering), fire safety management, fire fighting and fire investigation.

The BRE Innovation Park at BRE Garston is a world leading and ground breaking demonstration development designed to give a glimpse of how the future delivery of sustainable buildings and communities can be achieved not only in the UK but around the world. It features seven of the world's most sustainable houses (built to the Code for sustainable homes), a health centre of the future and over 300 different construction innovations and emerging technologies as well as a state of the art community landscape design. See:

<http://www.bre.co.uk/page.jsp?id=634>

The Technical Strategy Advisory Group of the IFE (TSAG) in collaboration with BRE is therefore holding a one day workshop and tour of the Innovation Park to give IFE members an opportunity to explore and discuss these issues.

TSAG are keen to hear your views and welcome your participation. The key findings and recommendations will be published. Numbers will necessarily have to be limited.

To book your place, please go to www.eventsforce.net/ife/home/brefireworkshop

Directions to BRE at Garston can be found at:
